Greater Nottingham Transformation Partnership – 13 September 2018

What was the best thing about today?

- Able to put point of views across.
- The questions from the floor at the end
- Efficiently delivered

What could have been better?

- Less interested in the table discussions
- More indication that the panel are listening to us rather than answering questions.
- More time

Did you have any questions that you were not able to ask and would like us to respond to? (please include a contact number/email)

- Can you respond by email to all the written questions that there wasn't time for?
- Lots of time for questions - good panel

We're holding more public events to discuss the health and care transformation work. What would you like to see on the agenda?

- How it's going to be rolled out when.
- Involvement of staff within services.
- More honesty about what has been done and what has been difficult to do.
- Honestly - how will the savings be made and what was the outcome of the Centene work

Please give any other comments:

- Staff need to be honest and tell government that integration can't be done with current funds.

- A bit hard to understand the scale of the work that has to be done
- Self care is important but we need to know about the developments and impact of the Centene work

Please assess your overall satisfaction with the event on a scale of 1-5 (where 1 = very poor, 3 = average, 5 = excellent)

4

AVERAGE SCORE = 4
